Now legend has it that coffee was discovered by an Arab by the name of Omar. While visiting Ethiopia Omar saw a specific bush that birds would eat the berry from. Now these berries gave them spouts of energy. Omar would then eat the berry and think to himself: This is quite horrible and disgusting. Which is why Anthony over here, roast and brews them and turns them into coffee.

You know it's three dollars a coffee if you're a student.

Triple shot, thanks Anthony.

That's a lot of beans.

Across the road from the campus is the Hawthorn Aquatic and Leisure Centre. As a side note you can swim after eating, it's a myth that you can't. As a Swinburne student you can receive a subsidised membership through the SSAA with up to thirty six percent off.

After burning some calories at the pool, why not head over and get yourself a snack and a drink. I mean, you've earned it. Twenty five minutes of swimming around in the pool is about one hundred and eighty calories lost, which is equivalent to this bad boy over here.

Here at the Hawthorn Hotel, or also know as "The Hawka" we have special student nights every week.

Sometimes, you need a USB, and then sometimes you need a USB with a combination lock on it. And sometimes you need your Parrot Mini-Drones. This place CentreCom is a great place for your IT bits and bobs, near Burwood road just near the Hawthorn Hotel, it's a great place.

If you're feeling the urge to cook up a storm, or even feeling just a little peckish on some Pocky sticks why not come to Indomart. Just on Glenferrie road, super friendly super delicious, and great food. It's funny how everything's just around the corner.
Thanks to globalisation we can enjoy anything from the souvlakis, to kimchi. Kimchi is the national Korean dish. Yes... yes, yes it is.

Here at BeWon, they have great food, amazing deals and it's right next to Glenferrie station. Unreal!

Look, additionally there are some amazing parks near the campus. Look don't be scared to venture out - come on down to the parks because it's nice and quiet super great place to study, and has an amazing source of vitamin D.

Now you may be thinking: "Uh, yes, these places are amazing but are there any other amazing places?" Yes there are! Here are some amazing places recommended by students.

…and thank you.
