Title: Work Integrated Learning: Trang
Creator: Swinburne University of Technology
Year: 2024

Audio/video for this transcript available from: <http://commons.swinburne.edu.au>

TRANG: My name is Phuong Trang Nguyen. I just really love to build up relationship with people, and I actually major in Public Relations, Bachelor of Media and Communication. I have always studied at an international school back in Vietnam. The final goal is studying abroad. I saw that Australia is a very nice country. So I start looking for different options, and Swinburne is an amazing uni and a very practical one because it's providing us with opportunity to have some practical experience.

OLIVIA: Work integrated learning is a key feature of all the degrees. Swinburne is a great place to study. There's lots of support at Swinburne, which I think is a really interesting feature of what we do. So everything is very much set around supporting the students in so many different ways. Word has got around, and I think students really appreciate the support that we offer.

TRANG: Starting my job here with MediBank, I really appreciate it because I learn a lot of stuff from my coworkers.

LYDIA: She's doing really, really well, I would say, since she started her job, she integrated to the team really well, and she takes on the tasks that align with her academic background and also our company goals.

TRANG: Before this, I have never had, like, any experience working in a professional places before. So this really teach me a lot about that, also of how Australian working system is different from, like, back in my hometown county as well.

LYDIA: We really recognise that their experience is far beyond this. It's about their future, how they integrated into workforce after their graduation, and also about their development as a global professional. We help them to learn how Australian organisations operate and get insights.

TRANG: Please go to Swin Burn. Within the top 300 university within the world. It's a very practical university. Looking at me, as an experience. I'm currently working at my corporate job. I have one year experience. When I'm graduating from Swinburne I'll be putting on my CV saying that, Oh, I already have this one year of working with Medibank, the top company, and I just have to say Swinburne is amazing, and the staff are very helpful.
