Title: Stephen Graham - 2021 Social Impact Award Finalist

Year: 2021

Audio/video for this transcript available from: <http://commons.swinburne.edu.au>

Stephen Graham is the founder of the Graham Family Foundation, a philanthropic fund started by Steve and his wife Margaret.

Steve and his family have supported many projects over the years, including a school in the slums of Nairobi and the Edmund Rice Foundation's programs for disadvantaged children.

Steve graduated from Swinburne in 1973 with a Diploma in Civil Engineering and started what is now the Bild Group - a civil infrastructure, paving and road profiling business that works nation-wide.

After years of business success, Steve is now more focused on philanthropy – including funding Swinburne's Australian Leadership Index.

The Index exists to inspire, challenge and sustain leadership in Australia. As Steve puts it, the greater good is best served by encouraging improved leadership that actively serves the wider public interest.

After a life of hard work and business success, Steve continues to contribute, to the next stage of innovation that can transform our world for the better, and we thank him for his generosity.
