Title: Swinburne's Adobe Creative Campus

Year: 2021

Audio/video for this transcript available from: <http://commons.swinburne.edu.au>

### VO

It's time to share your story! To push boundaries and break barriers! To learn, create and collaborate! It's time to make!

At Swinburne you're part of Australia's first creative campus. We want to equip you to learn new skills in a digital world, to communicate new ideas to a wider audience than ever before, to take your big ideas and make them accessible to everyone who reads, watches, experiences or listens to them.

You will be supported by peers and industry professionals along the way so you can have the confidence to share your own story. This is industry ready.

### Ellen

The stuff I've learnt the most was through playing with creative tools and the Adobe programs whilst I was studying and whilst I was at uni.

Not only do you get a lot of technical practice using the programs so you're a lot quicker whilst you're at work using them, but a lot of the ideas you have and a lot of the passion and energy you put forward into those projects will inform what kind of decisions you will make whilst you're at work. Might even give your company new ideas and new ways of doing things and new projects to explore themselves.

### VO

As a part of the Creative Campus, you will get access to powerful tools with the Adobe Creative Cloud for free, for you to use for whatever you like, whether it be Uni work, passion projects or just to play and learn.

You will have the opportunity to develop new skills with a wide range of exciting labs and workshops covering everything you need to know to start making. We have one on one support available in the library and the Adobe digital hub for resources, tutorials and support online for all students around the world.

Don't wait! Jump in and start making with Adobe today! Get started at [swi.nu/adobe-hub](http://swi.nu/adobe-hub)
